Education

University of Washington

Bachelor of Science in Computer Science and Software Engineering

Sept 2021 – Present

Bothell, WA

Projects

Portfolio Website - <https://reaganvu29.github.io/Personal-Website/> | *HTML, CSS*

Sept 2023

- Created my own personal portfolio website that highlights my skills and projects

Package Tracker - <https://packagetracker.tech/> | *TypeScript, Next.js, Tailwind, Mapbox, Firebase, Auth0*

Feb 2023

- Managed a team of three in making a full-stack web application for TransportHacks hosted by Major League Hacking, winning best overall project
- Researched viable shipping companies and their respective tracking APIs to determine feasibility of integration with backend data layer
- Designed and oversaw audiovisual components of project including formal documentation, website presentation, and script writing

Replayed - <https://replayedgg.vercel.app/> | *TypeScript, SvelteKit, Tailwind, Chart.js, Supabase*

Feb 2023

- Collaborated with group of three to make a full-stack web application incorporating quiz, game, and social aspects with real time comment system
- Streamlined website development process by creating prototype for project design using Figma and Excalidraw, implementing UI and UX principles
- Aided in development of PostgreSQL Supabase database schema as well as injecting initial entries to scaffold data architecture

Procrabstinator - <https://procrabstinator.vercel.app/> | *Astro, Tauri, Next.js, React, Rust, SQLite*

Jan 2023

- Participated with group of three to produce a desktop application that helps users stop procrastinating through encouragement of good habits
- Devised and implemented project schema for SQLite database to structure upcoming tasks and distracting applications
- Designed and oversaw development of video and graphical assets, including presentation and logo, as well as writing documentation

Ecology Keystone Network - <https://ecologykeystonenetwork.netlify.app/> | *HTML, JavaScript, Mapbox*

Nov 2022

- Cooperated with four people to develop a web app allowing users to visualize and comprehend the scale of ongoing global ecological disasters
- Served vital role in researching and designing project elements, allowing group to comfortably reach minimum viable product in time constrained environment
- Planned and coordinated group stand-ups in a time pressed environment to ensure effective development workflow and communication

Technical Skills

Languages: C++, Java, Python, SQL, HTML, CSS

Frameworks: Markdown, Java Swing

Tools: SQLite, Git, Figma

Experience

SEIU 775 Benefits Group

Individual Provider

Nov 2020 – Mar 2021

Renton, WA

Newport Hills Swim and Tennis Club

Lifeguard

Jun 2019 – Sept 2019

Bellevue, WA

Kumon Institute of Education

Academic Tutor

Jan 2019 – Jun 2019
